PROFESSIONAL SUMMARY

Entry-level Full Stack Developer with hands-on experience building backend-driven web applications using Node.js, Express.js and PostgreSQL. Developed real-world projects involving RESTful API design, concurrent user handling and normalized database schema design. Actively seeking junior developer or associate roles where I can contribute immediately while continuing to grow in a production environment.

PROJECTS

Streamlining College Canteen Operations with a Digital Token System
Tech Stack: Full Stack (HTML, CSS, JS, Node.js, Express, PostgreSQL)

- Designed and implemented an Express.js backend to manage real-time order queues and token generation, supporting 100+ concurrent users.
- Designed normalized PostgreSQL schemas to store and manage 500+ transaction records efficiently.
- Implemented asynchronous JavaScript updates to refresh token status in real time, improving UI responsiveness and user experience.

NFT Marketplace Interface – Bootcamp Mini Project
Tech Stack: Full Stack (HTML, CSS, JS, Web3.js)

- Demonstrated understanding of dApp workflows, including wallet authentication, NFT metadata handling, and simulated blockchain transactions.
